

S8 Table. The generalized Wilcoxon test sorted by the last TW drug in the triple drug group.

		The last Triple Whammy drug					
		RASIs		Diuretics		NSAIDs	
		Chi-square value	p	Chi-square value	p	Chi-square value	p
The last Triple Whammy drug	RASIs	-	-				
	Diuretics	0.17	0.68	-	-		
	NSAIDs	1.56	0.21	2.09	0.15	-	-

Cases in which multiple TW drugs were started at the same time were not included. Abbreviations: NSAIDs, nonsteroidal antiinflammatory drugs; RASIs, renin angiotensin-system inhibitors.
