

S6 Table. The generalized Wilcoxon test sorted by the TW drug in the single drug group.

		Triple Whammy drug used					
		RASIs		Diuretics		NSAIDs	
		Chi-square value	p	Chi-square value	p	Chi-square value	p
Triple Whammy drug used	RASIs	-	-				
	Diuretics	144.2	<0.001	-	-		
	NSAIDs	275.1	<0.001	12.17	<0.001	-	-

Cases in which multiple TW drugs were started at the same time were not included. Abbreviations: NSAIDs, nonsteroidal antiinflammatory drugs; RASIs, renin angiotensin-system inhibitors.
