

S5 Table. The generalized Wilcoxon test sorted by the number of TW drug combinations.

		Number of types of Triple Whammy drug used					
		Single		Double		Triple	
		Chi-square value	p	Chi-square value	p	Chi-square value	p
Number of types of Triple Whammy drug used	Single	-	-				
	Double	24.74	<0.001	-	-		
	Triple	2.66	0.10	11.78	<0.01	-	-

Cases in which multiple TW drugs were started at the same time were not included.
